Products Featured

This project saw the installation of:
Twig Backed and Backless Benches (TWIG1 / TWIG2) and Sit Bin Enclosures (SIT5-2)
To view the full TWIG and SIT Suites visit our website.

Context

A selection of TWIG and SIT furniture items were customised and incorporated into the newly opened Steel Taipan Roller Coaster at Dreamworld Gold Coast.

Considerations

Urbis's design intent for Dreamworld's Steel Taipan Roller Coaster was to create a space that was in line with the snake like nature of this ride. CCS colour oxides and powder coat colours, along with custom laser cut patterns were chosen to create the illusion of an arid atmosphere which is consistent with where these reptiles would often be found.

Opportunities

The TWIG and SIT suites includes a cohesive range of furniture items that allow for ease of customisation and personalisation to a specific space.
