**Project Design** - Lisa Gumley + Alexander Lotersztain

## Products Featured

This project saw the installation of:  
Sit Backed and Backless Benches as well as  
Sit Integrated Tables.

To view the full SIT Suite visit our website.

## Opportunities

The SIT suite includes a cohesive range of furniture items that allow for ease of customisation and personalisation to a specific space.

## Context

A selection of Sit furniture items were customised and incorporated into the newly developed Moncrieff Community Recreation Irrigated Park.

## Considerations

Redbox Design Group's intent for Moncrieff's Community Recreation Irrigated Park was to create a space that families within the community could come and enjoy a comfortable, safe and fun area that promotes healthy living. Visual connection to music was a design element that was featured as a laser cut pattern throughout the furniture supplied to this project. This detail was in reference to the Australian musician that the suburb was named in honour of, Gladys Moncreiff, who performed in concerts for troops in both World War II and the Korean War.
